1571aab6e034

Overrides
s4.walkforward=purged_embargo@1

Methods used

metrics.periods_per_year=observed_density@1

s1.quality.gaps=gaps@1

s1.quality.null_rate_drift=null_rate_drift@1

s1.quality.range=range@1

s1.quality.relationship=relationship@1

s1.quality.schema=schema@1

s1.quality.timezone=timezone@1

s2.lookahead_lint=ast_rules@1

s2.sanity=bounds@1

s2.truncation=prefix_truncation@1

s4.walkforward=purged_embargo@1 ◆ EXPERIMENTAL

s5.dsr=bailey_lopezdeprado2014@1

s5.pbo=cscv@1

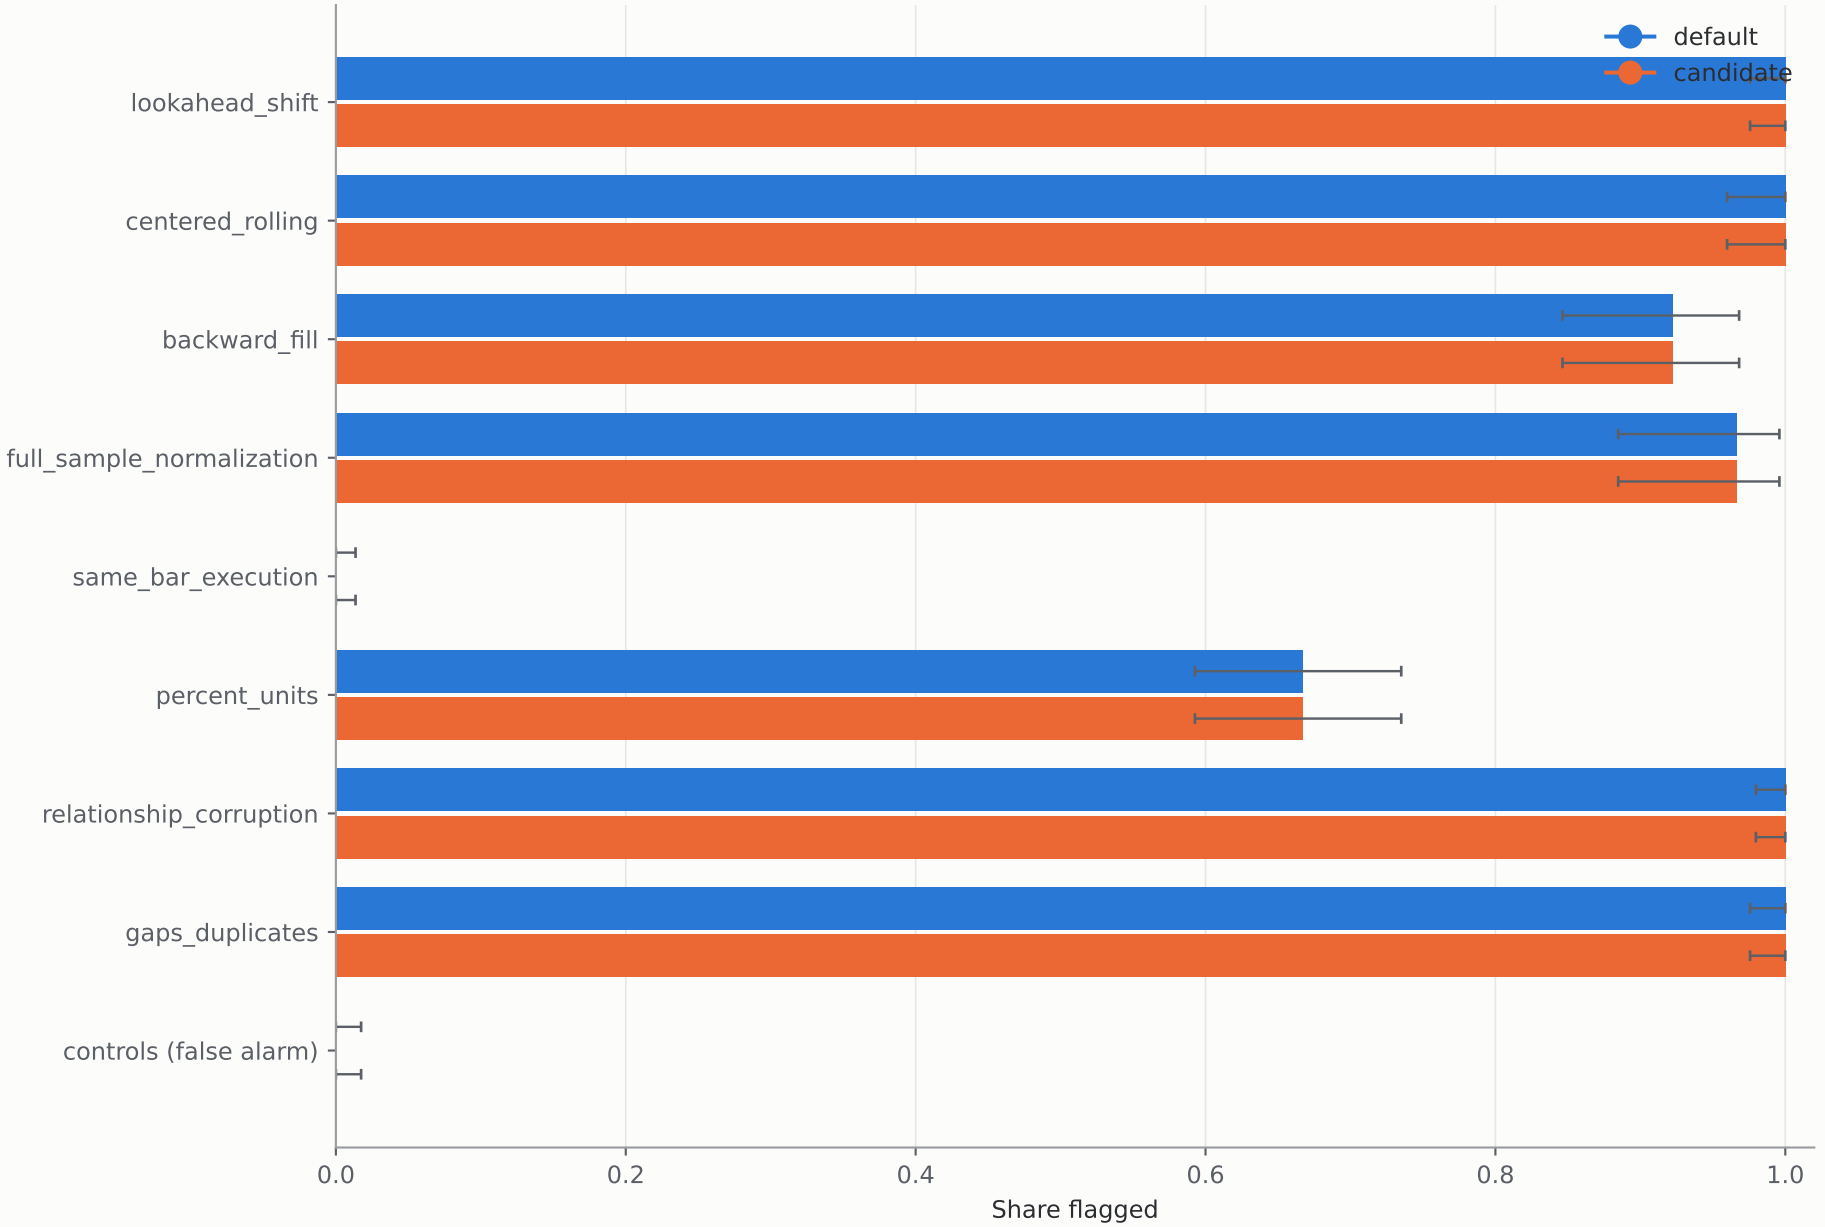

s6.bootstrap=stationary_politis_romano1994@1

EXPERIMENTAL: a non-default method version was used; it is not promoted by this report.

The default arm ran over exactly the same generated data as the candidate arm.

Synthetic/research use only, not investment advice.

Planted bugs: detection rate per bug class

Controls are clean code and data; there a lower share flagged is better.

Synthetic/research use only, not investment advice.

Planted bugs: every variant (1/3)

Bug class	Variant	Kind	Flagged (default)	Flagged (candidate)
lookahead_shift	shift_minus_1	detect	30/30	30/30
lookahead_shift	shift_minus_2	detect	30/30	30/30
lookahead_shift	shift_minus_5	detect	30/30	30/30
lookahead_shift	shift_minus_variable	detect	30/30	30/30
lookahead_shift	shift_minus_variable_k5	detect	30/30	30/30
centered_rolling	center_window_5	detect	30/30	30/30
centered_rolling	center_window_21	detect	30/30	30/30
centered_rolling	center_via_variable	detect	30/30	30/30
backward_fill	bfill	detect	30/30	30/30
backward_fill	bfill_limit	detect	30/30	30/30
backward_fill	bfill_via_getattr	detect	23/30	23/30
full_sample_normalization	price_zscore	detect	30/30	30/30
full_sample_normalization	demeaned_return	detect	28/30	28/30
same_bar_execution	same_bar_vol_0.003_raw	detect	0/30	0/30

controls	expanding_zscore	false alarm	0/30	0/30
controls	forward_fill	false alarm	0/30	0/30

Synthetic/research use only, not investment advice.

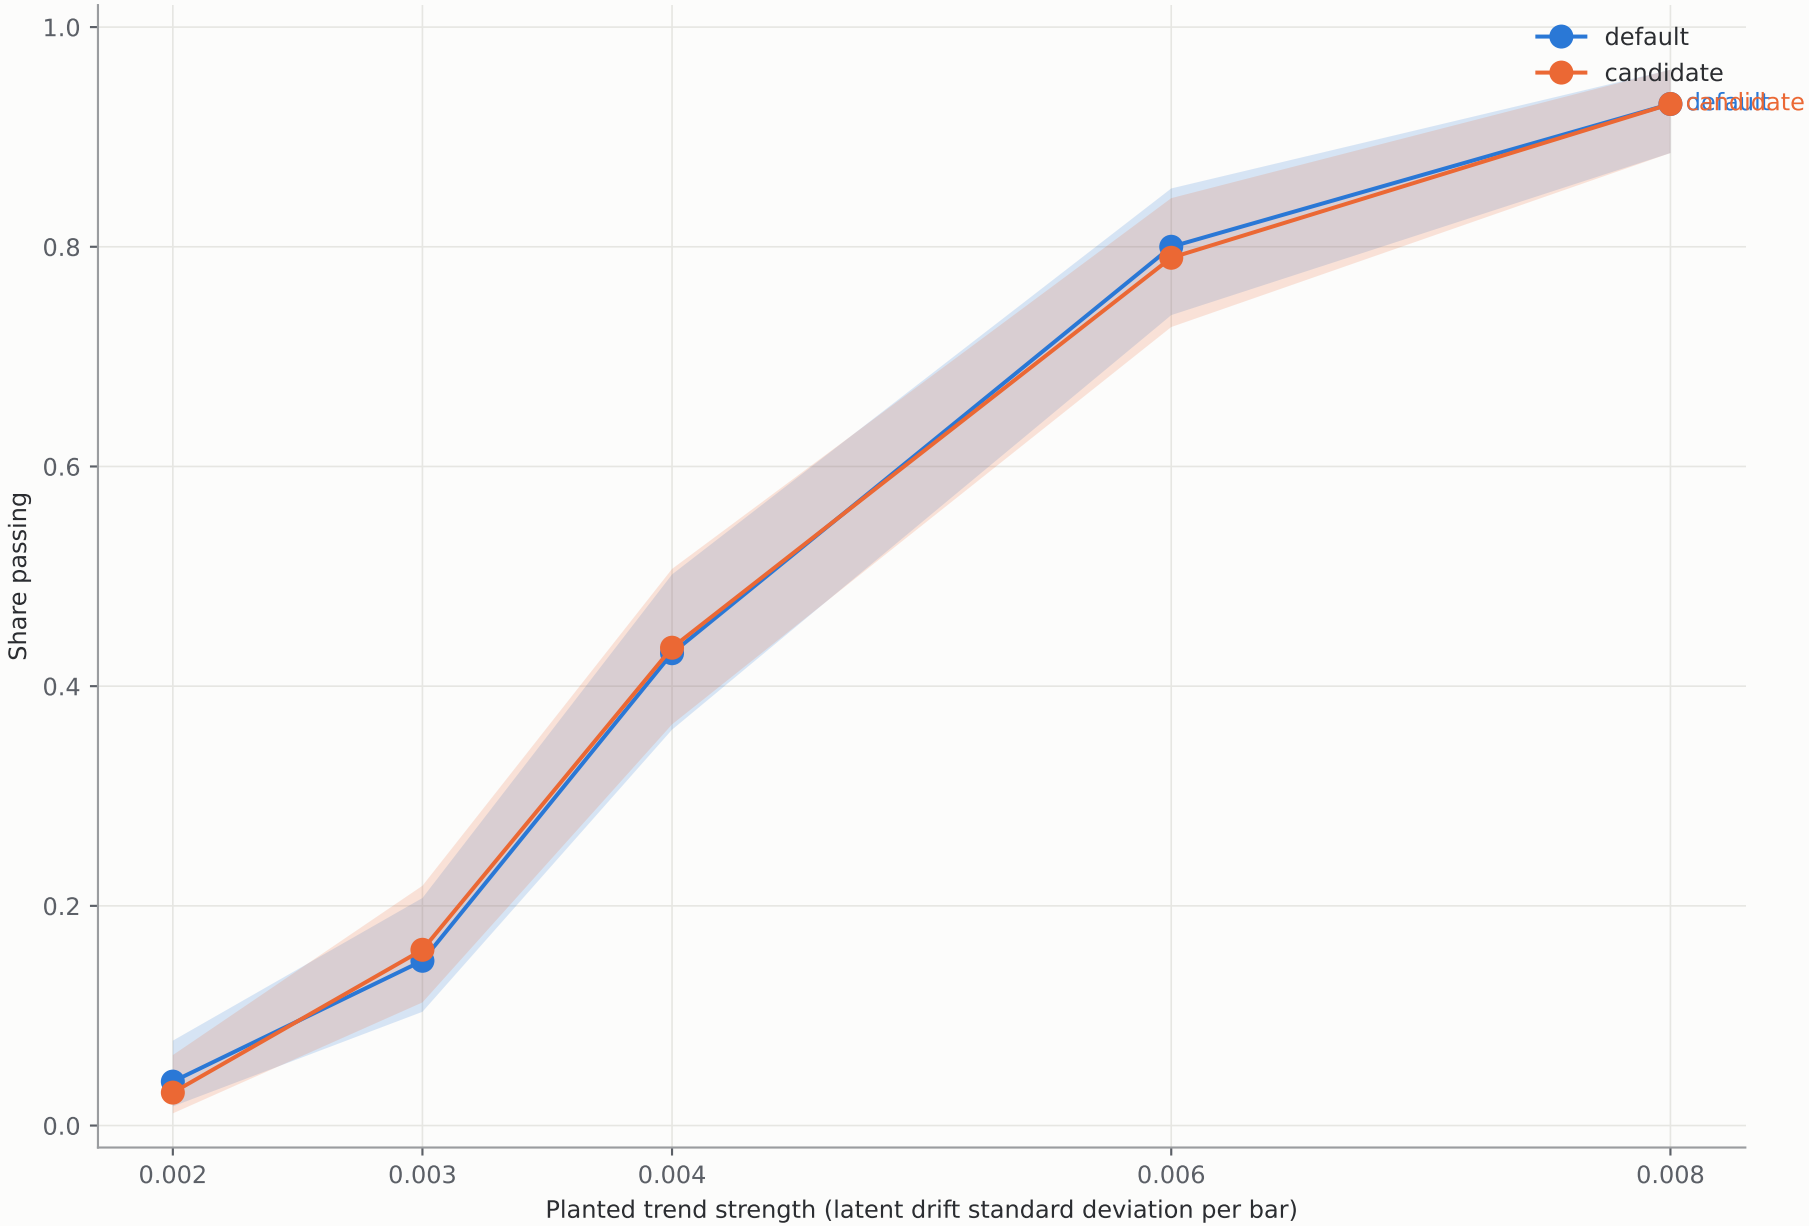

Noise false positives: share of pure-noise families passing S3-S5

Dashed line: nominal level 1 - min_dsr. Bars: exact 95% interval.

Synthetic/research use only, not investment advice.

Known-edge power: share of planted-trend datasets passing S3-S5

Synthetic/research use only, not investment advice.

Default vs candidate (gated metrics)

Method differences: s4.walkforward: rolling_anchored@1 -> purged_embargo@1

Metric	Default	Candidate	Delta (points)	Fisher p	Distinguishable	Better (a=default, b=candidate)
power/s0.002	8/200	6/200	-1	0.7868	no	a
power/s0.003	30/200	32/200	1	0.8902	no	b
power/s0.004	86/200	87/200	0.5	1	no	b

fpr/g36_t500	0/150	0/150	0	1	no	tie
detect/backward_fill	83/90	83/90	0	1	no	tie
detect/centered_rolling	90/90	90/90	0	1	no	tie
detect/full_sample_normalization	58/60	58/60	0	1	no	tie
detect/gaps_duplicates	150/150	150/150	0	1	no	tie
detect/lookahead_shift	150/150	150/150	0	1	no	tie
detect/percent_units	120/180	120/180	0	1	no	tie

both arms ran over identical generated data; Fisher's test treats them as independent samples, which is conservative

Synthetic/research use only, not investment advice.
